

# Bird Populations

Lesson Title: Bird Populations

Page 1 of 1

Name: \_\_\_\_\_

Visit the following website and read the *Overview and the Discussion*. Use the information on these pages to complete the table below.

## Movements of Bird Populations

<http://www.birdsource.org/GIS/index.html>

Type of Movement	Spatial Extent	Time Scale	Example
Seasonal Migration			
Range Expansion/Contraction			
Irruptions			
Static Populations			

### What Does it Mean?

In your own words, describe each type of bird movement that you have learned about in this lesson. Specifically address the types of patterns for which researchers look. Discuss the similarities and differences among the different types and the ways that scientists study these movements.
