

## Mammoths and Other Mammals

*Lesson Title: The Rise and Fall of the Mammoths*

*Page 1 of 1*

Name: \_\_\_\_\_

**Go to the following website:**

### **Mammals' Family Tree**

<http://www.bbc.co.uk/beasts/familytree/>

**Scroll your mouse over the illustration to learn more about the evolution of mammals. As you look at this website, respond to the following questions:**

- What were the earliest mammals like?
- How were the early Therians different from the earlier mammals?
- How did the Placental mammals differ from mammals that came before them?
- To which group did the mammoths belong?
- Which living species are most related to the mammoths?
- What three groups of animals can also be found in the same branch as the elephant?
