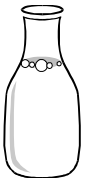
Name:_____

Fact Collecting

Lesson Title: *Louis Pasteur-a Microbe Discoverer*

Directions: In this lesson you will be learning about Louis Pasteur. Use this sheet as you would a journal or reading log. It will help you understand the topic of the lesson and give you some background information for the project that you will do at the end. Take notes under each heading throughout the lesson.



- Pasteurization (What is it? Why is it important?)

- The discovery of microscopes (Who discovered them and what did this lead to? Were microscopes upon first discovery like the microscopes of today?)

- Louis Pasteur (Who is he? What did he do? How did he do it?)

- Microbes and disease (When was the link between these two made, and how?)
