

Seeing Around Corners

Lesson Title: Seeing Around Corners

Page 1 of 1

Name: _____

Answer the following questions to show what you learned about periscopes.

1. How does a periscope let you see around corners and over and under things?

2. How does the periscope affect the size and shape of the objects you see?

3. How could you make a periscope that would let you see behind you? (Hint: Look at the diagram of how a periscope works and think about where the light has to enter it.)

4. What ways could periscopes be used in real life?

5. CHALLENGE QUESTION: Can you read writing through your periscope? Why or why not? (Hint: Think about what writing looks like in a mirror.)
